

EBUG-UKI

2021

May 4th

## Community collaboration and working together

- NERS
- Ideas Exchange
- Exchange of Experience days
- Focussed projects e.g. SCONUL; Leganto dashboard
- Alma monthly meetings
- Community led decisions about Conference planning
- We're lucky to be able to provide conferences free – but please keep sending us ideas and please keep offering to present.

# EPUG-UKI coordinated voting

- **NERS** – in the past we have worked together on NERS voting (thanks Chris Jones). Agreeing to vote tactically and spend some of our votes on the top UK enhancement.
- It is quite a big job to co-ordinate voting to try to leverage the vote in our favour. Is it still worth doing?
- **Ideas Exchange** – even with limited voted – this has been a really useful tool for us to get new features into our products.
- If you suggest an idea – send it round the listservs to ask for votes.
- And if you comment on the idea you will receive an update when ExLibris send communications out about that Idea.

# EPUG-UKI Knowledge sharing

- You ARE all Jedis. No matter how long you have been running with ExLibris products. You will know something only you know.
- Ask questions on the lists – there are no stupid questions.
- Not only Alma Jedis but massive amount of experience in all ExLibris products
- Some of the projects we as a community have worked on together
  - Leganto Dashboard
  - Click and Collect discussions on listservs
  - Resource Sharing
  - Analytics days
- Knowing who might be working in a particular area and what the next big thing is. This is often the useful side of physical conferences. Adhoc catchups.
- Blue sky thinking – Collections as Data; Text and Data mining; Website Accessibility compliance, Equality initiatives to do with metadata.

# EPUG-UKI Knowledge sharing

- Alma monthly meetings
- Big thank you to Thomas Kistell who managed these meetings. He is unable to continue due to work commitments.
- We want to set them up again
- We can use the IGeLU Zoom account
- We will be asking you what you want:
  - Is monthly still the best schedule?
  - What day of the week? (fixed or changing)
  - Rotating chair – can we share the load?
  - Share point for documents – now linked to from EPUG-UKI website.
